CLOUD LIBRARY: INSTRUCTIONS FOR KINDLE FIRE DEVICES

Initial App Setup and Use

1. **Download the Cloud Library App from the bibliotheca website and install it on your Kindle Fire device.**

2. **Open the newly installed Cloud Library App `CL` from your device's Apps Menu.**

3. **Tap the screen to continue.**
   Select **United States** > **Utah** > **Salt Lake City Public Library** on the subsequent screens.

4. **Enter the barcode from your City Library card as well as your PIN number.**
   When done, tap the `Login` button in the middle of the screen.

5. **Browse the eBook collection to find the title you would like to check out.**
   Tap `☰` in the upper left corner, then tap `Browse`. You can browse by category via the menus across the top of the screen, or search by specific title or author by tapping the **Search** `🔍` icon in the upper right-hand corner of the screen.

6. **Borrow the book you would like to read.**
   To do so, tap the image of the book cover once, then press the green `Borrow` button.

7. **That's all! The book will be added to your `My Books` tab within the app and should open automatically for you to begin reading.**
   The book should also start downloading automatically for offline reading; no further action is necessary for the book to be available in offline mode. Otherwise, you can download any book you currently have checked out by tapping the `⬇` symbol that appears on the cover of each book. To open this book (or any other book you currently have checked out) again in the future, go to the `My Books` tab and tap the cover of the book. You can also open a book by tapping the blue `Read` button next to the book.

To Return a Book

Your book will return automatically after the loan period has elapsed (typically 21 days). If you wish to return your book early, go to the `My Books` area of your account and tap the `RETURN` tab in the upper right-hand corner of the screen. Then tap the red `RETURN` button next to each title you wish to return.

Tips and Tricks

- **To place a bookmark** at any point in the book while reading, tap the page you'd like to bookmark, then tap the **Bookmark Ribbon** `🔖` at the top of the page.

- **To close a book**, tap the screen to bring up the on-screen menu interface, then tap `< CL` in the upper left-hand corner of the screen.
